**Hello All:**

**I appreciate our conversations today concerning the site. I know that we all want this to happen as quickly as possible and expediting the proces. As I mentioned, I think it is important for us to identify any road blocks to getting to the VCP. It seemed to me that the VCP may be more of a long term approach to the site after the Removal Action is concluded but not sure.**

**Is there a possibility of the Group/Lubrizol entering into a Removal Administrative Order on Consent with the TCEQ and then go into the VCP?**

**Also, it is my understanding that the Trustee may be still be entertaining prospective purchasers for the property following the conclusion of the removal action (worth checking on this). How would this impact the current approach?**

**Thanks**
